

පළාත් අධ්නපන දෙපාර්තමේන්තුව - උතුරු මැද පළාත மாகாணக் கல்வித் திணைக்களம் - வட மத்திய மாகாணம் DEPARTMENT OF EDUCATION – NORTH CENTRAL PROVINCE

Grade 7

SECOND TERM TEST - 2019

SUBJECT - **Science**

Name of the Student/ Index No :

Time: 2½ hrs.

Part I

Answer all the questions.

Underline the most suitable answer

- 01. A plant which does not bear flower is,
 - (1) Curry Leaves

- (2) Drynaria (Benduru)
- (3) Long bean

- 02. A part of a plant that does not belong to the shoot system,
 - (1) Apical bud

(2) Fruit

- (3) Top root
- 03. Following features could be observed in a plant of which the root system has been removed.
 - Veins spread as a net throughout the leaf
 - Flower with four petals

That plant may be,

(1) Monocot flowering plant

(2) Dicot flowering plant

- (3) Non flowering plant
- 04. The magnification of eye piece of a microscope was x 10 and the objective lens is X10. The magnification of the microscope is,
 - (1) 1

(2) 10

(3) 100

05. Select the LED that lights up.

- 06. Tissues which carry food and minerals in a plant are,
 - (1) Xylem, Phloem

(2) Phloem, Xylem

(3) Phloem, Pith

- 07. The reason for using water when preparing saline water is its,
 - (1) Coolant property

(2) Transparency

- (3) Solvent property
- 08. A solution in a bottle without a label in the laboratory gives following colours with litmus.

Type of litmus	Given colour
Red litmus	Blue
Blue litmus	Blue

Page 1 of 8 Grade7 - Science

That Solution is,

(1) Sulphuric acid

(2) Sodium Hydroxide

- (3) Sodium Chloride
- 09. Following is a set up of a simple cell.

Negative terminal of the above cell is,

(1) Copper sheet

- (2) Diluted Sulphuric acid
- (3) Zinc Sheet

- 10. Which one of the followings generates Alternating current?
 - (1) Dry cells
 - (2) Dynamo
 - (3) Lead acid accumulator
- 11. Select the energy transformation way that occurs when electricity is generated by wind.
 - (1) Potential energy ————>Electrical energy
 - (2) Kinetic energy Electrical energy
 - (3) kinetic energy ———>Potential energy
- 12. Following properties could be observed in an image formed by a certain mirror.
 - Cannot be obtained on to screen.
 - Smaller than the object
 - Erect

That mirror is a,

(1) Convex mirror

(2) Plane mirror

- (3) Concave mirror
- 13. What is the correct ascending order of sound energy transmission?
 - (1) Solid, Liquid, Gas

- (2) Gas, Liquid, Solid
- (3) Gas, Solid, Liquid

- 14. On which tectonic plate is Sri Lanka situated,
 - (1) Philippine tectonic plate
- (2) Antarctica tectonic plate
- (3) Australian tectonic plate
- 15. Select the mirrors, from which the following light beams could be obtained.

(1) A – Plane, B – Convex, C - Concave

(2) A – Concave, B – Convex, C - Plane

(3) A – Plane, B – Concave, C – Convex

Page 2 of 8 Grade7 - Science

16.	The Unit of measuring atmospheric pr	essure is,	
	(1) Joule	(2) Millibar	(3) Kelvin
17.	Use of this equipment is,		
	(1) To store static electrical charges.		
	(2) To identify static electrical charge	S.	4
	(3) To generate static electrical charge	es	11
18.	Select the layers of the atmosphere rele	evant to the following incidents.	N-
	• Place where the International S	Space Station is located	
	• The cool layer of the atmosphere	ere	\sim $^{\circ}$
	• Where the ozone canopy is loc	cated	100,
	(1) Thermosphere, Mesosphere, Strate	osphere	
	(2) Mesosphere, Thermosphere, Strate	osphere	
	(3) Thermosphere, Stratosphere, Meso	osphere	•
19.	Only invertebrates are included in,		
	(1) Dolphin, Ichthyophis	(2) Salamander, Lizard	(3) Prawn, Star fish
20.	An animal who uses the streamlined sl	hape for existence is,	
	(1) Fish	(2) Lion	(3) Lizard
	Egnesijou		

Page 3 of 8 Grade7 - Science

Part – II

Answer only 5 questions including question no. 1

ii. When go upwards in the stratosphere, temperature decreases. iii. The coolest layer in the atmosphere is mesosphere. iii. Vibration is not compulsory to produce a sound. iv. The resolving power of the compound light microscope is 500 times than the naked human eye. () v. Camouflage is used to find food by animals. () vi. The amount of electrical charges that can be stored in a capacitor is measured by Farads. () vii. Sound travels through air more efficiently. () viii. Larynx is the common part for both respiratory and digestive systems. () ix. To increase the efficiency of dynamo, the number of turns of the coil should be decrease. () x. Direction of the current could be found by center – zero ammeters. () xii. Curve mirrors are used in side mirrors of vehicles to see rare view. () 20. Select the correct words from the brackets and fill the blanks. (water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television, Ichthyophis, electrical cell) i	 ii. The coolest layer in the atmosphere is mesosphere. iii. Vibration is not compulsory to produce a sound. iv. The resolving power of the compound light microscope is 500 times than the naked human eye. v. Camouflage is used to find food by animals.
iii. Vibration is not compulsory to produce a sound. iv. The resolving power of the compound light microscope is 500 times than the naked human eye. () v. Camouflage is used to find food by animals. () vi. The amount of electrical charges that can be stored in a capacitor is measured by Farads. () vii. Sound travels through air more efficiently. () viii. Larynx is the common part for both respiratory and digestive systems. () ix. To increase the efficiency of dynamo, the number of turns of the coil should be decrease. () x. Direction of the current could be found by center – zero ammeters. () xi. Erect, real images are formed by plane mirrors. () xii. Curve mirrors are used in side mirrors of vehicles to see rare view. () 20. Select the correct words from the brackets and fill the blanks. (water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television, Ichthyophis, electrical cell) i	 iii. Vibration is not compulsory to produce a sound. iv. The resolving power of the compound light microscope is 500 times than the naked human eye. v. Camouflage is used to find food by animals.
iv. The resolving power of the compound light microscope is 500 times than the naked human eye. () v. Camouflage is used to find food by animals. () vi. The amount of electrical charges that can be stored in a capacitor is measured by Farads. () vii. Sound travels through air more efficiently. () viii. Larynx is the common part for both respiratory and digestive systems. () viii. Larynx is the common part for both respiratory and digestive systems. () ix. Curve mirrors are used in side user. () ix.	· · · · · · · · · · · · · · · · · · ·
ix. To increase the efficiency of dynamo, the number of turns of the coil should be decrease. () x. Direction of the current could be found by center – zero ammeters. () xi. Erect, real images are formed by plane mirrors. () xii. Curve mirrors are used in side mirrors of vehicles to see rare view. () 20. Select the correct words from the brackets and fill the blanks. (water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television, Ichthyophis, electrical cell) i	vii. Sound travels through air more efficiently.
x. Direction of the current could be found by center – zero ammeters. () xi. Erect, real images are formed by plane mirrors. () xii. Curve mirrors are used in side mirrors of vehicles to see rare view. () 02. Select the correct words from the brackets and fill the blanks. (water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television, Ichthyophis, electrical cell) i	viii. Larynx is the common part for both respiratory and digestive systems.
xi. Erect, real images are formed by plane mirrors. () xii. Curve mirrors are used in side mirrors of vehicles to see rare view. (2) Select the correct words from the brackets and fill the blanks. (water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television, Ichthyophis, electrical cell) i	ix. To increase the efficiency of dynamo, the number of turns of the coil should be decrease. (
xii. Curve mirrors are used in side mirrors of vehicles to see rare view. (2) (3) (3) (3) (4) (5) (5) (5) (5) (8) (8) (8) (8	x. Direction of the current could be found by center – zero ammeters. ()
O2. Select the correct words from the brackets and fill the blanks. (water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television, Ichthyophis, electrical cell) i	xi. Erect, real images are formed by plane mirrors.
(water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television, Ichthyophis, electrical cell) i	xii. Curve mirrors are used in side mirrors of vehicles to see rare view. ()
Ichthyophis, electrical cell) iare important as a support to the stem. ii. From the composition of the atmosphereis the most abundant component in the troposphere. iii. The functional unit of the organisms is	02. Select the correct words from the brackets and fill the blanks.
 i	(water, cells, androecium, nitrogen, a medium, mechanical, stilt roots, solvent property, crow, television,
 ii. From the composition of the atmosphere	Ichthyophis, electrical cell)
troposphere. iii. The functional unit of the organisms is iv. Anther is a part of	iare important as a support to the stem.
iii. The functional unit of the organisms is iv. Anther is a part of	ii. From the composition of the atmosphere is the most abundant component in the
iv. Anther is a part of v. Breaking of food in to smaller particles by teeth is the	troposphere.
v. Breaking of food in to smaller particles by teeth is the	iii. The functional unit of the organisms is
vi	iv. Anther is a part of
 vii. Electricity can be generated by chemical reactions in	v. Breaking of food in to smaller particles by teeth is the digestion.
viii	viis needed to travel sound.
 ix. For the existence of life, streamlined body shape is helpful for. x. Sugar is produced by removing the	vii. Electricity can be generated by chemical reactions in
 x. Sugar is produced by removing the	viii
xi. Static electrical charges can be experienced by the	ix. For the existence of life, streamlined body shape is helpful for
xii is a vertebrate.	x. Sugar is produced by removing the in the sap of the sugar cane.
	xi. Static electrical charges can be experienced by the
03. Following experiment is conducted by a grade 7 student to generate electricity, to identify the function of	xii. is a vertebrate.
dynamo.	

A.		
i.	Mention an observation of this experiment.	(01 Marks)
ii.	What is the method of generating electricity in a conductor when magnetic field is cutting	with the
	conductor?	(01 Marks)
iii.	Write down two changes that can be made to increase the efficiency of a simple dynamo	
iv.	Mention 02 equipment which generate simple current.	(02 marks)
v.	Give 02 alternating sources which can be used as a solution for electricity crisis.	(02 marks)
В. У	Write down the energy transformations for following instances.	
i.	Generating electricity by a solar cell	
ii.	Generating electricity by a dry cell.	
iii.	Producing sound from a radio	
iv.	Generating electricity from wind ///// Drinking Straw	
A. 7	Two drinking straws are charged by rubbing with a polythene and keep closer as in the above	e figure.
i.	What is your observation?	(01 marks)
ii.	What is the conclusion of that observation?	(01 marks)
iii.	What is your observation if the rubbed piece of polythene keep closer to the drinking straw	
iv.	Mention the convulsion you obtained there?	(01 marks)

04.

B.

05.

i.	Name the 02 zones in the screen. A	(02 marks)
ii.	B To observe the zones clearly, should the torch be moved towards? Or out wards?	(01 marks)
iii.	Write down two instances where convex and concave mirrors used in day to day life.	(02 marks)
	Concave mirrors- Convex mirrors -	
	Name X, Y and Z X A A A A A A A A A A A A	
i.	Name the types of roots in A and B	(02 marks)
ii.	A	(02 marks)
	В	

iii.	Categorize the following animals as	vertebrates and invertebrates.		
	(earthworm, turtle, spider, shark)			
	a. Vertebrates		(02 marks)	
	Invertebrates			
	b. What is the reason for the above	e categorization?	(01 marks)	
B.	A C			
	В			
			70,	
		O ₁		
	D	1.		
i.	Name the A,B,C parts in the above	microscope.	(03 marks)	
	A			
	В	•		
	C			
ii.	What is the type of lens used in that		(01 marks)	
	, , in is and type of folia discontinuo	Jan 1980 Per		
iii.	What is the importance of D?		(01 marks)	
111.	what is the importance of B.		(01 marks)	
06 Plant	and animal bodies are created with t	he collection of cells		
A.	and annual bodies are created with t	ne concetion of cens.		
i.	Name 02 arrays in the human hady			
1.	Name 02 organs in the human body		(02 marks)	
ii.	Name 02 systems in the plant body.		(02 marks)	
	*			
	ndicators are used to identify acid ba	ses in the laboratory.		
i.	i. Name 02 natural indicators. (0			
ii.	Complete the following table.			
	Indicator	Colour with acidic substance	Colour with basic substance	
	(a)	Red	Blue	
	Phenolphthalein	(b)	Pink	

Red

Methy orange

Page 7 of 8 Grade7 - Science

(C.		
	i.	What is the chemical substance dissolve in sea water, which makes it salty in taste?	(01 marks)
	ii.	How do fish obtain oxygen for respiration through gills needed for respiration?	(01 marks)
	iii.	What is the method used to classify organisms based on their external features.	(01 marks)
